

7.0 AGENCIES CONSULTED

The Proposed Action involves demolition of the Physics Building high bay, which is a historic property. NNSA will seek concurrence from the SHPO regarding the mitigation plan for this historic property. This plan can include activities such as archival medium-format photos, compiling existing drawings, preparing a current set of as-builts, preparing a detailed report on the history of the building, and conducting interviews with persons who work or worked in the building. The photographic documentation would have to be completed before any demolition work on the building.

NNSA has determined that no consultation with the U.S. Fish and Wildlife Service regarding the potential effect of the Proposed Action on federally protected threatened or endangered species or their critical habitat is necessary as there would be no adverse effect to individuals of sensitive species or their critical habitat from the Proposed Action.

A floodplains and wetlands assessment of the Proposed Action has been prepared and included as an appendix to this EA. This is in accordance with DOE regulations regarding floodplain/wetlands environmental review requirements pursuant to 10 CFR 1022.
